blu box fireplaces
bluboxfireplaces.com.au

Add the beauty of a clean burning open fireplace to your outdoor room or garden this summer with some of our incredibly easy D.I.Y fire design concepts using our newly released Blu Box Outdoor Burner, affectionately named “BOB”.

open fire

Not only do Blu Box Fireplaces look great and present you with a beautiful lively flame, they radiate enough heat to take the chill off as the sun goes down in the evening. Relaxing and entertaining in front of your very own open fire has never been easier.

Check out the simple but important clearance and safety information on the back page before getting started !

easy

No need for a chimney, no need for a complicated gas or electricity connection. No mess, no fuss. You can use your Blu Box Burner to create a fireplace just for you – you can even take it with you when you move.

safe

With eight years of award-winning R&D behind us, Blu Box Fireplaces comply with the highest safety standards in the world. Made from high quality materials by ISO9001:2008 manufacturers, Blu Box Fireplaces come with a limited 12 month warranty.

green

Smokeless and odourless, Blu Box Fireplaces run on denatured ethanol (also known as methylated spirits) – a renewable, clean-burning liquid biofuel. Available from most hardware stores and grocery outlets or you can buy it through The Fire Company at www.e-nrg.com.au

1

rustic charm

Create a rustic centrepiece to sit around in the evenings by using half an old wine barrel available from most landscape stores or recycling op-shops. Fill it with soil, insert the burner, cover the soil with river pebbles and you're done.

shopping list:

- half wine barrel
- potting mix
- gravel, river pebbles or lava rocks
- 10cm deep strip of lead flashing or thin metal to line the inside rim of the barrel
- Blu Box BOB burner

fire and water

Mesmerizing and calming, combining the elements of fire and water are an instant hit. Pumps are available from hardware stores or garden centres at the same time as you pick out your pond or sculpture – dress it up with plantings, a couple of fish and your friends will be very impressed.

shopping list:

- large pot or garden urn
- small fountain pump
- gravel
- Blu Box BOB burner

3

fire pots

Pots come in all shapes, sizes and styles and look great alone or in clusters. Once you've selected your pot(s), fill them with soil, insert the burner and dress around with gravel, fireproof stones or a hanging plant for when the fire is not in use.

shopping list:

- selection of pots
- potting mix
- gravel, river pebbles or lava rocks
- Blu Box BOB burner/s

4 balcony fire planters

Inner city balconies, yes you can!
Add warmth and the magic of fire to even the smallest balcony by converting a planter box or low line tub into a stunning series of flames. Just fill it with soil, insert the burner and dress around with your chosen fireproof finish.

shopping list:

- low line ceramic planter or tub
- potting mix
- gravel, river pebbles or lava rocks
- Blu Box BOB burner/s

5

a cosy fire bench

Alfresco areas have lots of scope for DIY designs. A bench, a ledge, a table or tray – dress it up with fire by inserting a burner. Add a glass screen for a beautiful effect.

shopping list:

- bench ledge or table
- steel plate or tiles to set the burner into
- circular glass screen
- Blu Box BOB burner

blu box fireplaces brought to you by the fire company

Established in Australia in 2002, The Fire Company leads the way in the design and supply of ethanol fireplaces around the world. Its first brand - the multi-award winning EcoSmart Fire™ (www.ecosmartfire.com) is now available in more than 52 countries.

Blu Box Fireplaces is The Fire Company's latest inspiring collection and includes both indoor and outdoor burners, fireboxes and freestanding fireplaces.

IMPORTANT SAFETY POINTS TO REMEMBER:

- **As with any open flame - ensure a minimum clearance of 2000mm to the nearest flammable material (curtains, branches, paper and so on) for safe operation in all weather conditions.**
- **Burner may only be installed into a non-combustible surface.**
